

Gough Linear Vibratory "Pellet" Screen – *Advanced design for the 21st century*

The Gough linear vibratory pellet screen is a specially designed version of Gough's family of vibratory products to screen unwanted material from pellets. Its stainless steel perforated plate screen deck has been specifically developed to provide "safe areas" for product loading and reject discharge. The special pellet deck works in complete harmony with gentle vibration and provides for efficient removal of "longs" from the pellet. A second lower deck can be fitted, if required, utilizing a woven wire mesh for the removal of dusts and fines. The Gough linear vibratory pellet screen is available in a multitude of sizes to suit process capacities from 100 lbs/hr – 20,000 lbs/hr.

Removes longs and angel hair
De-dusting granulate
Cleaning re-grind

Angel Hair

Longs

Fines

Good Pellets

Tough, Gentle, Clean
